Letter of Recommendation
The Abell Architectural Group, Inc.

To Whom It May Concern,

The city of Medford for the past several years has been attempting to pursue building a new police facility. Funding the project has always been the hurdle we have failed to get over.

During the process we have worked hand in glove with the Gene Abell, of The Abell Architectural Group. They helped with the initial program planning, with space needs analysis, estimating costs, rendering preliminary designs and made multiple presentations to our City Council.

We continued to call on them to update estimated costs and to retain their services should the opportunity present itself to actually move forward with the construction of a new police facility.

Short of finding us the needed funding, they have supported our every effort with professional services and outstanding customer services.

With confidence and trust I enthusiastically recommend and endorse Gene Abell, and The Abell Architectural Group to anyone looking to construct a commercial or public service facility.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Schoen".

Randy Schoen – Chief of Police
